

HOUP® - (H2348) **Thermal Insulation Vaccine Cooler Box** comes with a 3-year warranty against manufacturing defects.

Specification for HOUP® - (H2348) Vaccine Cooler Box

Vaccine storage volume (L):	18-23 litre
Internal Storage Volume (L)-without ice pack	48 litre
Weight fully loaded (Kg): with ice packs	29.8 kg
Weight empty (Kg):without ice packs	13.8 kg
External dimensions:(LxW xH mm)	770x620x520 mm
Internal Storage dimensions:(LxWxH mm)-without ice pack	520x368x278 mm
Vaccine Storage dimensions:(LxWxH mm)	450x300x170 mm
Insulation thickness:	100 mm
Ice pack type -made according (WHO/PQS/E005/IP01.2)	0.6 litre
Number of Ice pack	20 Ice packs
Cold life at +43°C:	128 hours
External and Internal Materials	Polyethylene

Manufactured in South Africa with 100% local content
Constant temperature performance.

(H2348) Thermal Insulation Vaccine Cooler Box Specification

HOUP™ - (H2348) Thermal Insulation Vaccine Cooler Box manufactured locally as per WHO specification (WHO/PQS/E004/CB01.2).

SPECIFICATIONS

Unique Features

- Locally manufactured with 100% local content
- Constant temperature performance.
- Recessed handle for easy packing and lifting.
- Lockable latch.
- Stable stacking.
- WHO Approval in progress.
- Ice packs included.
- Designed to offer vaccine freeze protection.

Manufactured in South Africa with 100% local content
Constant temperature performance.

Specification for HOUP® - Water Ice packs made in accordance with WHO PQS E005

Volume of water per pack	0.6 litre
External dimensions	190mm x 120mm x 34mm
Raw Material	Low density Polyethylene
Weight filled with water as per WHO specification	Max 720g
Standard Specification	0.6-L compliant with WHO PQS E005
